

De-Palletizers

Trinamics automated De-Palletizers are designed simplify the unloading of bulk pallets. Product can be reintroduced to a packaging line fom batch freezing or removed from the line for storage.

The De-Palletizers are constructed with a heavy-duty fabricated base frame of stainless steel with continuously welded construction throughout. Four chain overhead sweep assembly includes two powered overhead sweeps (one operates within the pallet area and the second operates at the conveyor load station).

Consult your Sales Representative for application specific details.

De-Palletizer

Features:

- Clean, efficient design
- Precision machining throughout
- Variable speed servo main drive motor and gear reducer
- Stainless steel lower guarding
- Heavy duty fabricated stainless steel frame
- Panelview 600 HMI with color display

Benefits:

- Premium quality assures long service life
- Customers work directly with Trinamics
- High quality, low maintenance, saves labour
- Easy to troubleshoot and service, saves time
- Fast changeover provides greater uptime
- Productivity and profit maximized

Options:

- Central or cluster lubrication
- Upgradable touch-screen interface
- Stainless steel washdown
- Recommended spare parts

De-Palletizers can be used for a wide range of applications in most industries including:

- Food and Beverage
- Confections
- Pharmaceutical
- Household and Industrial
- Manufacturing
- Automotive
- Dairy
- Meat and Poultry
