

# Case Sealers

TR1500TST, TR2500TST, TR3500TST  
TR1500TSHM, TR2500TSHM, TR3500TSHM

Trinamics fully automatic case sealing systems are designed to provide a highly effective and efficient method of sealing the top and/or bottom of cases. Our continuous duty, high quality case sealing systems provide reliability, durability and long service life.

Designed with precision machined components and heavy-duty construction, the sealers accommodate a wide variety of case sizes and speeds to suit most applications.

Sealers are available in pressure sensitive tape and hot melt configurations.

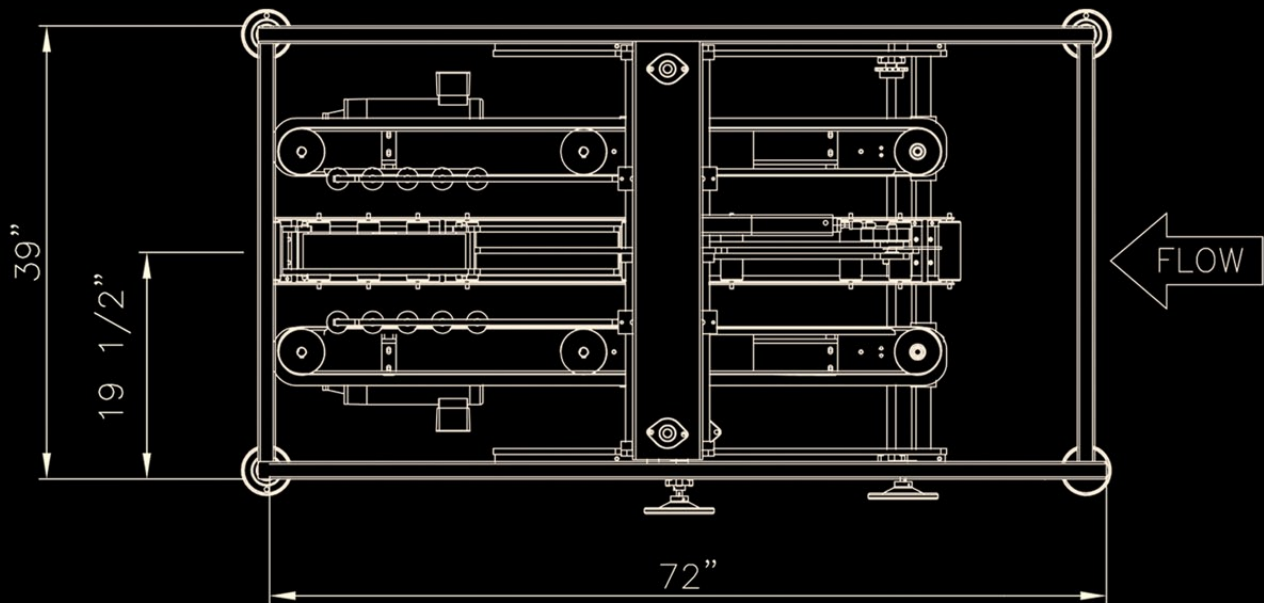

# Case Sealers

## Features:

- Fully automatic, compact size, case sealing system
- Clean, efficient design
- Precision machined parts throughout
- Operator panel is located for safety and convenience
- Case infeed sensors
- Total case-flap control throughout sealing
- Main control panel with electrical disconnect
- Lexan<sup>®</sup> and steel panel guarding
- Nordson<sup>®</sup> hot melt adhesive or Dekka<sup>®</sup> tape applicators
- Conveniently located E-stops
- PLC controls all machine functions
- 220, 440, 575 VAC 3Ø 60HZ
- Detailed Maintenance/Service manual

## Benefits

- Free standing and fully automatic
- Requires minimal space
- Guarding eliminates risk of injury
- Minimal operator attention required
- Rugged construction provides long service life
- Easy to safely view system operations
- Efficient, consistent, repeatable operation
- Minimal maintenance required
- Customers work directly with Trinamics
- Smooth acceleration that is easy on the product
- Productivity and profit maximized

Case Sealers can be used to seal a wide variety of case sizes in most industries including:

- Food and Beverage
- Confections
- Pharmaceutical
- Household and Industrial
- Manufacturing
- Automotive
- Dairy
- Meat and Poultry
